Letter of Intent

I would like to highlight that I recently completed my secondary education (S6) in Software Development in Rwanda. During my studies, I developed a strong interest in technology, problem-solving, and innovation. Although I am at the beginning of my academic journey, I am highly passionate about to continue learning and growing both academically and personally, for me I believe skills is a useful facility that enables us to do things with ease, that push me to find all opportunities of boosting my skills. I may not yet have extensive professional experience, it's been one year after graduated from high school, but I am committed, disciplined, and eager to take advantage of opportunities that will help me build my future career. I believe this program will help bridge the gap between my current knowledge and my long-term goals

Are there any aspects you would like to elaborate on in your current documents and applications or any points you want to draw the evaluation committee's

I am currently not employed, as I have recently completed my secondary education. I do not have an employment confirmation document to provide, all jobs I got was a dairly job not fixed job with fixed position

A document from your current institution confirming your position and employment.

Perhaps youre going to be sorry for me, I have recently graduated from secondary school, I am not currently affiliated with an institution that requires permission for participation in this program.

An official document from your current institution indicating that you have been granted permission to participate in program.

I am applying to this program because I am highly motivated to gain international exposure and develop new skills that will support my academic and professional growth. I have many ideas I want to build, I have project called "Implementation Of Zero-Latency, Topological Vacuum-State Communication" this idea I believe can change the way we think, like what if we take vacuum of space as a superfluid lattice and use it as channel for communication" I believe can be very useful facility in entire world. Learning Turkish will open doors for me to access higher education opportunities in Türkiye and collaborate with international communities. I have recently graduated in software development, and I want to continue my studies in technology-related fields and eventually contribute to innovation and digital development in my country and in all nations.

Please explain your motivations for applying to program and how this program aligns with your career goals or academic plans.

To be honest starting learning english was too difficult, you know when you are starting like trying to speak foreign english, actually you start by thinking in your local language, translate, then you speak. That takes long time and sometimes you make mistakes because every languages has it's grammars. I have experience using English as my language of education, and I am able communicating in both written and spoken English. I also speak Kinyarwanda as my native language. Currently, even though I do not have prior knowledge of the Turkish language, but I am highly motivated to learn it. I am confident in my ability to learn new languages quickly, as I have already developed communication skills in multiple languages.

Share your previous experiences in learning Turkish or other foreign languages. Indicate your proficiency level and which languages you have learned.

During this program, I am particularly interested in exploring Türkiye's rich cultural heritage, historical sites, and modern development. All it will be my first time reach in Türkiye that's why I am also interested to explore different areas of Türkiye

What are your specific areas of interest you would like to explore about Türkiye during this program? Specify the cultural, historical, economic, social,

After completing this program, I plan to apply the knowledge and skills I gain to contribute to the development of my country. By learning Turkish and gaining international experience, I will be better prepared to access educational opportunities and partnerships between Rwanda and Türkiye, I have ideas I want to build like 1. Implementation Of Zero-Latency Topological Vacuum-State Communication. 2.Buildind Quantum Computing Reflective Algebra, P vs NP. 3.Time Encoding Computing System and I beleive those system will play great role in all nations.

How do you plan to apply the knowledge and skills gained during this program to benefit your home country or the institution you work for? Please explain

I have not yet had the opportunity to participate in international education programs or travel abroad. However, I am eager to gain such experience, and I believe this program will be an important first step in my international exposure

If you have participated in similar international education programs or had experiences abroad before, please provide information about them. Explain how

To be honest, I do not have sufficient personal financial resources to support international education. I am looking for this scholarship program as my key, and indeed I need to get this opportunity.

Do you need any additional financial support apart from the program you are applying for? If yes, how do you plan to secure this support?

I learned about the KATIP program through online research and scholarship platforms while searching for international education opportunities

How did you learn about the KATIP program?

A letter of recommendation (a recommendation letter from someone who knows you well and can attest to your academic or professional achievements).
